RENEWABLES

Environmental Policy

We aim to minimise the impact of our wind farms on the environment, the land and communities where we operate

We are committed to:

We do this by:

- Understanding and managing our impacts on flora, avifauna and fauna

- Conducting rigorous monitoring program to assess our impacts
- Implementing mitigation measures that are effective, offsets and other measures to manage impacts

- Protecting and improving the natural and cultural values of the land on which we operate

- Ensuring measures to protect and improve the natural and cultural values of the land we operate are implemented

- Meeting our legal and compliance commitments

- Strongly focussing on our compliance, regulatory and other commitments

- Improving our management processes and prevent pollution

- Undertaking regular checks on our performance, setting objectives and targets, implementing improvement measures
- Monitoring our emissions and waste

- Being transparent about our environmental issues, impacts and performance

- Reporting regularly and openly about our environmental issues, impacts and performance
